## EVV Reminder - KX Modifiers for Live-in Caregivers

The Prior Authorization process verifies if a worker is live-in care giver which does not require EVV data. However, that documentation does not transfer to the claims processing system.

**The KX Modifier is required on the claim** to identify the live-in care giver. KX should be in Box 44 of the

— next page —

UB04 form, following the CPT. If the KX modifier is not submitted to bypass EVV requirements the claim will deny.

## EDI 276/277: Claim Status Inquiry and Response

The **Claim Status Response (277)** transaction is used to respond to a request inquiry about the status of a claim after it has been sent to a payer, whether submitted on paper or electronically.
