

The HCBS settings rule free training code for Inclusa/iCare's residential providers will be changing as of August 1, 2026 to **INIC-SETTINGS-2**. This promo code will be valid until December 31, 2026 or until all of the codes have been used. The use of funding for free training will be reevaluated by DHS later this year to determine if it will continue in 2027.

DHS has been thrilled with the number of providers that have completed this very useful training. We encourage residential providers to continue to register, include staff at each setting and complete the training so they are fully informed about the HCBS settings rule requirements.

In addition, DHS has added the HCBS Settings Rule Modification Tool to assist providers in looking at HCBS questions. [HCBS Settings Rule Modification Tool \(P-03794\)](#)

If a residential provider has questions about the HCBS settings rule, please reach out to netdev@icarehealthplan.org.
