

HEDIS MEASURE OVERVIEW

Follow-Up After High-Intensity Care for Substance Use Disorder (FUI)

Please note that the information offered in this flyer is based on Healthcare Effectiveness Data and Information Set (HEDIS®) technical specifications. It is not meant to preclude your clinical judgment.

Measure description

The percentage of acute inpatient hospitalizations, residential treatment or withdrawal management visits for a diagnosis of substance use disorder among patients 13 years of age and older that result in a follow-up visit or service for substance use disorder. Two rates are reported:

- The percentage of visits or discharges for which the patient received follow-up for substance use disorder within the 30 days after the visit or discharge
- The percentage of visits or discharges for which the patient received follow-up for substance use disorder within the seven days after the visit or discharge

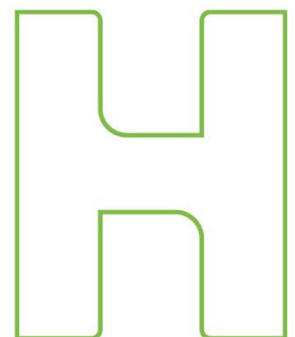

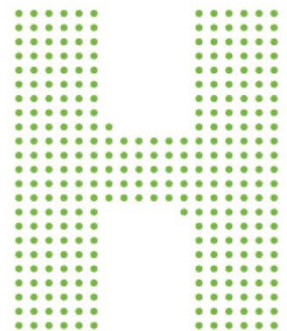

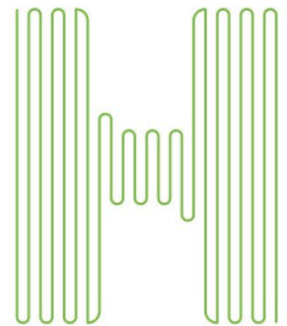

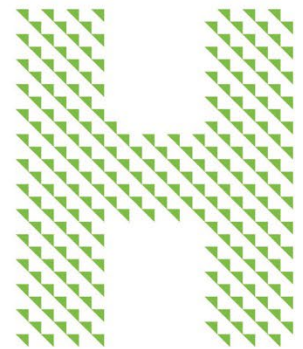

Who is included in the FUI measure?

Persons 13 years of age and older who had an acute inpatient hospitalization, residential treatment or withdrawal management visit for a diagnosis of substance use disorder are included.

Addressing the measure

Patients should have a follow-up visit or service for substance use disorder within seven days for the seven-day rate or 30 days for the 30-day rate, with any practitioner. The goal is to follow up with the patient as soon as possible, and **substance use disorder needs to be the primary diagnosis on the claim**. Follow-up visits occurring on the date of the episode do not count toward compliance. Acceptable follow-up visits include:

- Acute or nonacute inpatient admission
- Outpatient visit, telehealth, intensive outpatient or partial hospitalization
- Residential behavioral health treatment or stay
- Telephone visit
- E-visit or virtual check-in
- Pharmacotherapy dispensing event or medication treatment event
- Substance use disorder service
- Community mental health center visit
- Opioid treatment service that bills monthly or weekly
- Nonresidential substance use disorder treatment facility visit

Measure best practices

- Prioritize appointments for recent discharges.
- Attempt to reschedule missed appointments within 24 hours.
- Use appropriate documentation and correct coding.
- Explain the importance of receiving follow-up care to patients.
- Coordinate treatment between primary care providers and mental health providers.
- Refer patients to Humana Care Management for additional support and treatment adherence.

Exclusions

- Patients in hospice or using hospice services
- Patients who died anytime during the measurement year
