3. Overall numerical quality score is calculated as an average score, calculated as **the total sum of each individual measure divided by the total number of individual measures**. HMOs are displayed from highest overall ratings to lowest overall ratings.
4. Measures with small denominators (<30) will alter the HMO Report Card methodology as follows:
 - AOC scoring; a plan must have a scorable rate in at least 50% of the measures in each AOC to receive a star rating. N/A will be used to represent any AOC that does not have sufficient data to receive a star rating
